CE CERTIFICATION

WHAT IS CE MARK?

CE marking is a European conformity certification that ensures the conformity with health, safety, and environmental standards for products sold within the European Market.

CE marking Products are also recognized in global market other than EEA, This makes CE marking recognizable worldwide even to people who are not familiar with the European Economic Area. It is Similar to FCC declaration standards for electronic Devices in USA.

The CE mark consists of a logo and, the four digit identification number of the Notified Body which involved in the conformity assessment procedure (if applicable).

“CE” is abbreviated as “Conformite Europeenne”. The CE marking is a symbol of free marketability in the European internal Market.

“The CE marking is the manufacturer’s declaration for the product that meets the requirements of the applicable EC directives.”.

BENEFITS OF CE MARKING

It allows the manufacturer to freely sale their product throughout the European Economic Area.

- Promotes health and safety
- Enhances product credibility
- Leads to improved sales and greater customer satisfaction
- Ensures product compliance with the essential requirements of the relevant European health, safety and environmental protection legislation
- Permits the withdrawal of the non conforming products by enforcement authorities
- Reduce liability claims, timescale and costs

FIVE STEPS TO YOUR PRODUCT’S CE MARKING

STEP 1:

First step is to identify whether your product can be CE marked or not required. Not all products needs to CE Marked. We carry out the evaluation procedure on all requirements identified relevant to your product.

STEP 2:

Identify of the applicable requirements to your product
Our Auditors determine which directive is applicable to your product.

STEP 3:

Assessment of the product’s conformity
When all of the requirements have been established, we evidence that your product meets the essential requirements of the Directive(s)

STEP 4:

Compiling the technical documentation
Technical documentation needs to the product required to be compiled. This Documented information should have all the relevant aspect relating to conformity and is likely to include details of the design, development and manufacture of the product.

STEP 5:

We certify you product meets the CE directive requirements; You can now label your product as CE Marking approved.
