

## IATF 16949:2016 International Automotive Task Force

### ABOUT IATF 16949:2016

IATF 16949 certification which establishes the requirements for a Quality Management System (QMS) specifically for automotive sectors. The ISO 16949 standard was initially formed in 1999 by International Automotive Task Force to coordinate different analysis and certification schemes globally in the supply chain for the automotive sector. The IATF 16949 standard provides guidance and tools for companies and organizations who want to ensure that their products consistently meet customer requirements and customer satisfaction are consistently improved.

The main focus of the IATF 16949 standard is the development of a Quality Management System that assists for continual improvement, focus attention on defect prevention and the reduction of discrepancy and squander in the supply chain. The standard consolidated with applicable Customer-Specific requirements that defines the QMS requirements for automotive production, service and/or accessory parts. IATF 16949 standards established a regular set of techniques and methods for common product and process development for automotive manufacturing globally.

### IATF 16949:2016 CERTIFICATION

When you achieve IATF 16949 certification you will be able to demonstrate your adherence to quality to the automotive supply chain. It gives a great opportunity to intensify your business and prove that you are a trusted organization which could extend new business opportunities. IATF 16949 System Certification specifies the methods to execute best practices when designing, developing, manufacturing, installing and servicing of automotive products.
