

ISO 27001:2013 Information Security Management System

WHAT IS ISO 27001:2013 STANDARD ?

ISO 27001 provides a framework for systematic approach to managing sensitive company information so that it remains secure. It includes people, processes and IT systems by applying a risk management process. It can help small, medium and large businesses in any sector keep information assets secure.

ISO 27001:2013 CERTIFICATION

IAS is one of the well prominent ISO Certification Bodies in Malaysia. ISO 27001 (Information Security Management System) certification in Malaysia by IAS is all about the systematic approach to manage the sensitive information of the organization to keep it secure. ISO 27001 Information Security Management System (ISMS) certification is an international standard which aids you to identify the threat that may affect your organization's confidential information or data and implement the effective measures to reduce or eliminate those risk factors.

ISO 27001 certification for IT companies offers a methodological and well-organized attitude that will protect the confidentiality of your data, fortify the integrity of business data and intensify the availability of your business IT systems. ISO 27001 certification in Malaysia by IAS ensures that the process of your organization meets the requirements of the international standard.

What an Organization should do to achieve certification?

- Contact IAS for conducting Certification Audit and discuss audit procedure specific to your organization
- Understand the basic requirement of ISO 27001:2013 (Information Security Management System) in your organization. E.g. Documentation, training the staffs, practicing the system etc
- Plan & Conduct internal Audit program by trained ISMS Internal Auditors.
- Complete the data analysis.
- As a part of standard requirement, conduct a Management review with the help of analyzed data and take some decision to improve the Organization performance towards company objectives & goals.
- Complete the stage 1 & stage 2 audit successfully.
- Closure of Non conformance, if any found during the audit.
- Collect the certificate and maintain.
- Yearly, conduct the surveillance audit.

Process to obtain an ISO 22000:2018 Certification

- Organization initially adopts to requirement of ISO 27001:2013 standards and defines documentation on how this standard is practiced, monitored and continually improved. Once the requirements of the standards are in place, you can forward the application to IAS to certify your organization.
- For certifying an Organization to ISO standards, there will be two stages of audit.

*Stage 1 Audit: Readiness Audit (Verification of records, documents etc.)
Stage 2 Audit: Verifying the effectiveness Audit of the System*

- The organization applied for ISO certification has to be audited based on random samples of its sites, services, functions, products & process. Finally, our auditor listed out the deviations to the management. According to the grade of the deviations, the certification body determines the time needed for its closure including the correction and corrective actions which are approved by the certification body. After the effective closure of Non conformity/deviation, the Certificate has been issued limiting to the scope that was audited.
